

10. college attendance - array

11. Roll no's - array

12. playlist (music) - linked list

Q. write a c++ code which includes a class student, find out space occupied by object

Algorithmic efficiency:-

→ Brassard and Bratley - term 'algorithmics'

"Systematic study of fundamental techniques used to design and analyze efficient algorithms"

$f(n) = \text{efficiency}$

→ #include <iostream>
using namespace std;
class Student
{

int roll; //4

~~char~~ char name[30]; // 30 + ② → padding

float marks; //4

public:

void size()

{

cout << "space = " << sizeof(*this);

}

};

```
int main( )
```

```
{
```

```
    student s;
```

```
    s.size( );
```

```
    return 0;
```

```
}
```

outputs - size = 40
