

Q. Find the frequency counts for the following

1. `for(i=1; i<n; i++);` // 2 units } 3 units
`printf("Hello");` // 1 unit

2. `i=1;` // 1 unit } 4 units
`i=i+20;` // $1+1=2$ units
`printf("%d", i);` // 1 unit

3. `i=1;` // 1 unit }
`while(i<n) → n+1 units` } $3n+2$ units
`{`
`printf("%d", i); → n units`
`i++; → n units`
`}`

Q. For all the programs done in OS Lab find time complexity using frequency count

`echo -n "Enter 1st prgm" → 1`

`read n1 → 1`

`echo -n "Enter 2nd number" → 1`

`read n2 → 1`

`sum = $(n1+n2) → 2`

`echo "sum is $sum" → 1`

7 units
