

HW

What are the various problems which you have observed in society pick any 5 problems found if they can be solved using data structures and algorithms.

<u>problem</u>	<u>DSA</u>	<u>solution</u>
college timetable management	Arrays, graphs	helps organize classes & avoid timetable clashes
Traffic signal management	graphs, queues	Finds shortest routes and reduces traffic congestion
Hospital patient queue	queue, priority queue	give emergency patients priority and reduces wait time
Library book management	hash table, Binary search tree	quickly searches issues and returns books efficiently
waste collection route planning	Graphs, greedy algorithms	Finds the shortest collection route saving fuel and time
